19 East/West Road Uniport Road, Rumuokoro P.O.Box 12002, Port-Harcourt

OUR PURPOSE

To provide excellent ICT & Security Services to individuals and organisations with integrity to guarantee their peace of mind.

OVERVIEW

JIREH TECHNOLOGIES LIMITED, RC 450475, is one of the leading indigenous ICT and Security services company in Nigeria, delivering cutting-edge technology solutions through a team of experienced professionals committed to quality and excellence.

We have successfully executed major projects in ICT infrastructure, CCTV/security operations centres, telecommunications, and other capital projects. Jireh is also the first indigenous TSI to successfully conduct an Integrated Factory Acceptance Test (IFAT) in Nigeria for SHELL Nigeria (SPDC) telecom systems.

Certified to ISO 9001:2015 and enlisted with NCDMB as a High-Tech ICT Solutions Provider, we provide IoT integration, software and hardware solutions, APIs, and cybersecurity services.

With headquarters in Port Harcourt and a regional office in Lagos, Jireh delivers services across Nigeria to clients including SHELL, TOTAL, MTN, OANDO, GLO, NLNG, AVIAT, and others.

PURPOSE

To provide excellent ICT & Security Services to individuals and organisations with integrity to guarantee their peace of mind.

VISION

To build a sustainable ICT and Security services organization across Nigeria by 2028

MISSION

- Adopting global ICT standards in our delivery processes.
- Engaging in reliable technical and sales agreements with local and foreign industry players for effective deliverables and platforms.
- Building and retaining competencies around our business core values.
- Being focused, dynamic, and adaptive.

CORE VALUES AND GUIDING PRINCIPLES - EXCELLENCE, INTEGRITY AND QUALITY

Facility Management System is designed to **track company physical assets** (IT, furniture, vehicles, PPE, tools) from procurement → deployment → maintenance/ repair/ inspection → disposal.

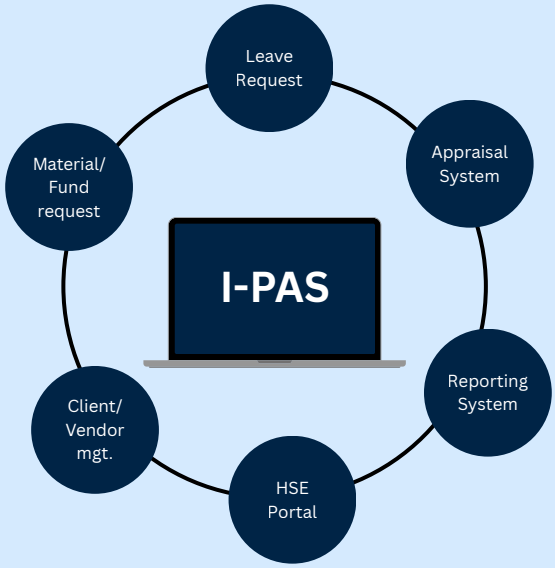

Key Benefits

- Reduced asset loss and misuse
- Lower maintenance costs
- Better financial planning
- Real-time assets tracking
- Inventory update & management
- Centralised asset monitoring
- Predictive maintenance system, etc

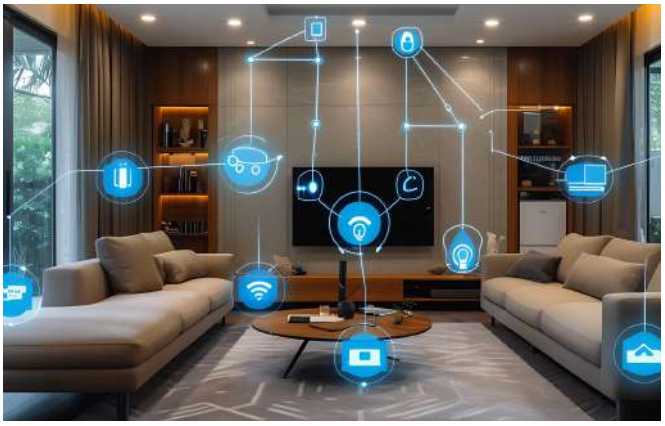

INTERNAL PROCESS AUTOMATION SYSTEM (I-PAS)

- Material/Fund request
- Leave Request
- Appraisal System
- Client/Vendor management
- HSE Portal
- Scheduler
- Reporting System etc.

A modular web-based system to manage and automate organizational processes, including:

IoT SYSTEMS INTEGRATION & AUTOMATION

Jireh delivers innovative technology solutions that provide comfort, convenience, and peace of mind. We leverage Artificial Intelligence (AI), Internet of Things (IoT), automation, and software integration to create smart solutions for homes, offices, schools, and security applications.

Our integrated solutions enable seamless communication between systems, hardware, and applications, improving efficiency, real-time data sharing, and overall system performance.

CUSTOM SOFTWARE DEVELOPMENT

Custom software development delivers tailored, scalable solutions designed around each client's unique business needs. Our services cover the full development lifecycle, from consultation and design to development, deployment, and ongoing support using modern technologies to improve productivity, workflow, security, and efficiency.

KEY FEATURES: Tailored Solutions | Scalable Architecture | User-Centric Design | Enhanced Security | End-to-End Support

VISITOR MANAGEMENT SYSTEM

A smart digital platform that streamlines check-in while capturing visitor data and managing access securely.

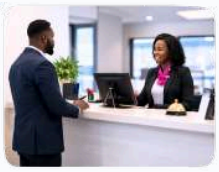

Email notification sent to host: Ensures only approved visitors gain access.

Visitor check-in

- By filling an e-form,
- Receptionist assistance, or
- Self-service

Ensuring fast, accurate, and secure visitor registration.

Request ID is generated via any of these options...

Access card issued to visitor: Restricts access to authorized areas only.

Visitor meets with host: Enables tracked and organized visitor engagement.

Visitor clocks out and exits: Keeps accurate records for security and compliance.

TRACKME

COMMUNITY POLICING SYSTEM (IOT)

Enables instant alerts to police, family, or alarms, reducing response time and improving safety during emergencies.

Alarm is Triggered

Registered Contacts are Alerted

The Police is Dialled

At ONE Click of the Button you send signal to multiple help lines

CRITICAL ASSET AND CCTV SECURITY SURVEILLANCE

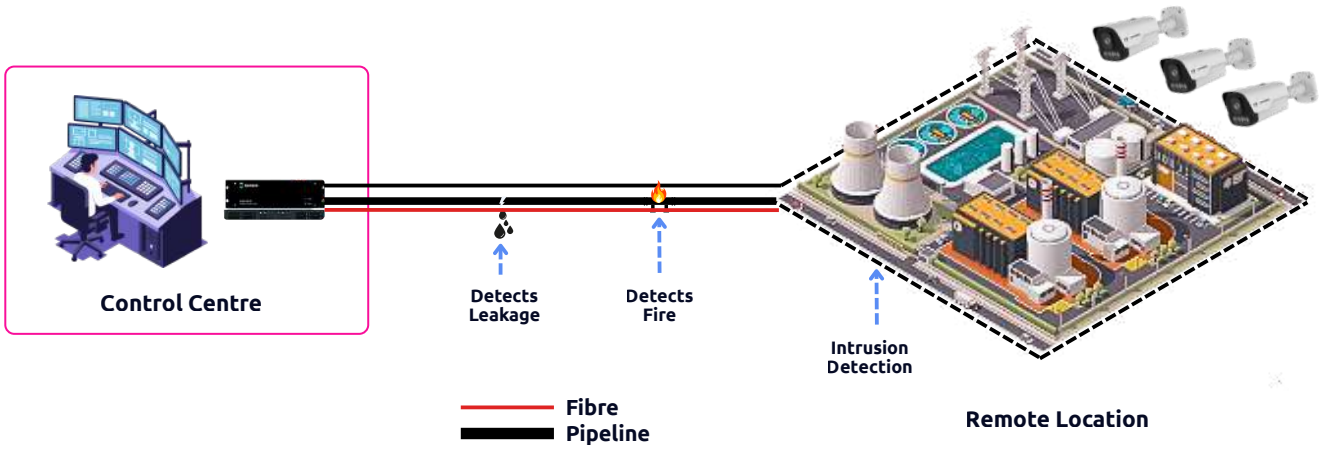

Jireh Technologies is a leading security solutions provider in Nigeria, delivering CCTV surveillance and critical asset monitoring solutions across the oil & gas, hospitality, healthcare, and financial sectors. We have maintained a CCTV surveillance contract with TotalEnergies since 2011 and delivered high-end security projects for clients including Shell.

We support leading OEMs including AXIS, Bosch, Pelco, Jovision, and ACTi, while providing advanced oil & gas monitoring solutions for **gas and oil leak detection, flame detection, thermography, flare and tank monitoring, CCTV integration, and 24/7 unmanned surveillance.**

SMART PIPELINE THREAT DETECTION USING FIBRE SENSING TECHNOLOGY IN HARD-TO-REACH AREAS

Enables early detection of leaks, damage, and intrusion detection to protect pipelines and reduce losses in remote areas.

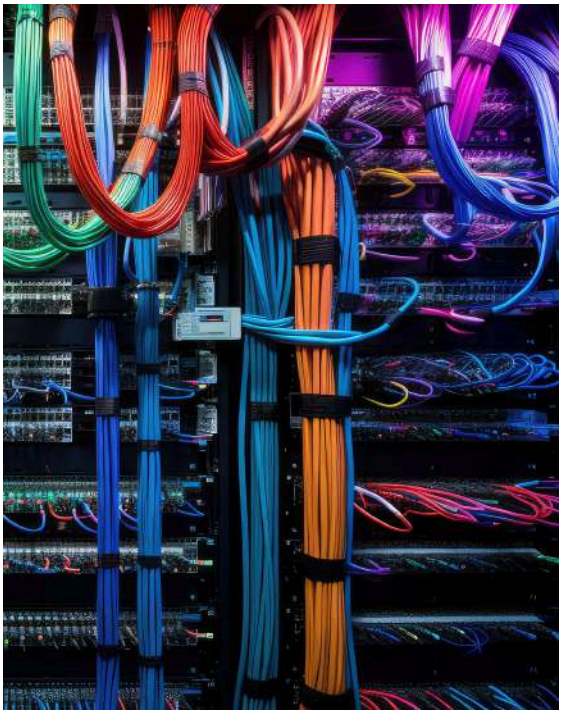

OUR ADVANCED CYBER SECURITY SERVICES DELIVER UNMATCHED PROTECTION FOR BUSINESSES

CYBERSECURITY SOLUTION

We offer robust cybersecurity solutions to protect your company's vital assets.

- **Network Security:** We deploy firewalls, intrusion detection systems,and other tools to block unauthorized network access.
- **Data Protection:** Our encryption, access controls, and backups safeguard the confidentiality and integrity of sensitive data.
- **Vulnerability Management:** We proactively identify and rectify system weaknesses to reduce risks.
- **Incident Response:** We create a strategy to swiftly address security breaches, limiting impact and downtime

CABLING SOLUTION

Jireh offers a wide range of cabling solutions for different applications. Local and wide area networking, as well as telecoms and instrumentation applications. It will be safe to consider this as our core. service with numerous references on our kit. We design, plan, install, and maintain cabling infrastructure with structured office and fibre optic cables for voice, data, video, and multi-media applications

SUPERIOR CABLING SERVICES FOR RELIABLE, AND SEAMLESS CONNECTIVITY

HSE AND COMPLIANCE

Health, safety, and the environment are some of the key or core strengths of Jireh. And we hold it dear, as it is a key factor in why we are able to deliver top-notch quality services across industry boundaries.

"SAFETY BEGINS WITH COMPLIANCE"

WE ARE COMPLIANT

We have an HSE and compliance unit whose responsibility is to engage all staff on a weekly basis on the importance of health and safety in our work environment, both onsite and offsite. They also provide means of checking and making sure all materials and equipment being used are in compliance with the stated requirements for executing a project.

They are also in charge of kiting and gearing up our professional team with the right sets of PPE required for a project.

CERTIFICATIONS: ● NCDMB ● ISO9001:2015
